Sporterizer

Application for Modern Sports Training Utilising
the Sensory Data and Positional System

author
Jan Ondruch

thesis supervisor
Ing. Vítězslav Beran, Ph.D.

Brno, 2018

Enables coaches to monitor positional
and biometric data of players in real time.

The coaches can analyze the recorded data.

This gives them a competitive advantage
over other teams.

Tags

Attached to the players,
the tags capture the data
and send it to a backend system.

sewio

Backend system

Processes, stores and computes
the received data and provides
it to the web application.
